

# The Nuremberg Code

- **Voluntary Consent**

1. The voluntary, well informed, understanding consent of the human subject in a full legal capacity is absolutely essential.

*Since NOBODY receives full disclosure & does NOT know the long & shortterm risks of the COVID Vaccines NOBODY is able to give informed consent!*

- **Scientific Studies**

2. The experiment should aim at positive results for society, unprocurable by other methods and be necessary.

*There is NO proof that there are NO other methods to treat Covid!*

- **Prior Knowledge**

3. The experiment should be justified based on animal experimentation and previous knowledge.

*There was NO animal testing & previous knowledge suggests that these vaccines entail a high risk of adverse effects.*

- **Injury & Suffering**

4. The experiment should be set up in a way that voids all unnecessary physical and mental suffering and injury.

5. Experiment should NOT be conducted when there is reason to believe in risk of death or serious injury

*Previous knowledge and animal testing clearly showed that there will be risk of death or serious injury*

P.S.: The Vaccines only have EUA and the experiments are still ongoing until 2022/2023

- **Protection**

6. The risk should never exceed human benefit.

7. Proper preparations should be made to protect the subject against even remote possibilities of injury, disability or death.

*There is NO proof that the risks do NOT exceed human benefit and there are NO preparations to protect participants.*

- **Qualified Scientists**

8. The experiment should only be conducted by scientifically qualified persons, with the highest degree and care is required through all stages of the experiment.

*The vaccinations are not being conducted by scientifically qualified persons and there is NO care during the experiment.*

- **Freedom to Withdraw**

9. Participants must be free to immediately quit at any time for any reason.

*There is no way to quit anything after you have been vaccinated.*

- **Termination of Study**

10. Scientists in charge must terminate the experiment if there is probable cause the experiment is likely to result in injury, disability, or death to the experimental subject.

*There are tens of thousands of probable causes that the experiments result in injury and deaths in the VAERS system.*

P.S.: The Vaccines only have EUA and the experiments are still ongoing until 2022/2023
